

SHARLEEN ATIENO

Apprentice Software Developer | Full-Stack & Go Specialist

sharleatieno@gmail.com

github.com/sharleatieno

Kisumu, Kenya

PROFESSIONAL SUMMARY

Results-driven Apprentice Software Developer at Zone01 Kisumu with strong technical foundations in full-stack web engineering, backend RESTful API design, and system algorithms using **Go (Golang)**, JavaScript, HTML5, and Tailwind CSS. Proven track record in Git repository administration, collaborative version control management, and building robust test-driven web applications.

TECHNICAL COMPETENCIES

LANGUAGES & WEB CORE

Go (Golang), JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

VERSION CONTROL & ADMIN

Git Repository Administration, Branching, Rebasing, GitHub, Gitea

BACKEND & ARCHITECTURE

RESTful JSON APIs, HTTP Server Design, Go Templates, Data Structures

TESTING & ENVIRONMENT

Go Unit Testing (**testing** package), Integration Testing, Linux / Bash CLI

SOFTWARE DEVELOPMENT PROJECTS

Quizphoria Learning Hub

Go / JSON REST APIs

- Engineered a full-stack learning platform using Go to serve RESTful HTTP API endpoints (**/api/questions**, **/api/submit**) on port 8080.
- Designed interactive scoring logic, automated feedback handlers, and persistent leaderboard state tracking.

Groupie Tracker Web Application

Go Templates / Testing

- Collaborated on a data visualization web service consuming external JSON APIs to render concert tours, artist profiles, and dates.
- Authored end-to-end unit and integration testing suites (**handlers_test.go**) verifying HTTP route status codes and payload delivery.

Push-Swap Algorithm

Go / Data Structures

- Served as Repository Administrator for a 3-developer team, managing Git merges, code reviews, and push permissions.
- Implemented stack-sorting algorithms and CLI input validation (**pkg/parser/ParseArgs**) to sort integer stacks with minimal operations.

ASCII-Art Web & Text Processing Suite

Go / Full-Stack

- Created a web-based banner generator transforming raw string inputs into formatted ASCII terminal graphics.
- Developed string formatting, case conversion, and number parsing algorithms in **go-reloaded**.

APPRENTICESHIP & EDUCATION

Software Development Apprenticeship

2026 – Present

Zone01 Kisumu — Kisumu, Kenya

Intensive peer-to-peer programming training focused on full-stack web technologies, algorithm design, version control workflows, and production-level software delivery.
